## GATE ACCESSORIES

### POLOphone Intercom

Allow visitors to communicate with people inside or to a Cellphone in order to gain access to the property. An incredibly versatile and reliable intercom for domestic & light commercial installations

### 15 Infrared Beams

Always recommended on any gate to stop the automated gate from impacting against anything in the gate's travel path. Available in wireless and hardwired packages.

### Inductive Loop Detector

Allow free exit of vehicle from the property without remote control. This requires a ground loop to be installed into the driveway.

### TrioCode or Tri-Tran™ Transmitters

Connect your garage door and gate to the same remote control! Available in Keyring, water-resistant and wireless wall mount models, TrioCode and Tri-Tran™ transmitters use multi-frequency technology to ensure security & interference are never compromised for your family.

### Panasonic Intercom/Camera

Internal intercom screen with external camera with matching keypad. Great looking street access!

### SmartSolar™ Solar Power

The specially designed converter/charger board at the heart of SmartSolar™ Solar Power kit makes eco-friendly power an affordable option. Needing only one solar panel, this board charges a battery unit thus allowing 'green' operation at night or during inclement weather

### TrioCode or Tri-Tran™ Wireless Keypad

Be it returning from a bike ride, the kids coming home from school, or the cleaner arriving while you're at work, the weatherproof wireless keypad allows access without a transmitter. With back lit numbers for day or night use, multiple users can have unique codes for specific door & gate access.

### Stand Alone Receiver

Use your TrioCode or Tri-Tran™ transmitter to operate other items around your home by connecting the Stand Alone Receiver to other compatible non-Automatic Technology appliances

### Access Control Pad

- ▶ 1000 unique codes using one to ten digits
- ▶ Three channel output
- ▶ Selectively add and delete user codes
- ▶ Back up memory
- ▶ SmartSwitch for tamper-proof outputs (optional)

### Smart Phone Control

Monitor your DOMINATOR Garage Door and Gate access from anywhere! You can allow single use access, or timed access to your property. You receive a phone notification every time it opens! The clever app will even tell you when your door and gate requires servicing!
