

The background of the advertisement is a photograph of a modern home's exterior. A large, closed, light blue garage door with horizontal slats is the central focus. To the right, a portion of a red sports car is visible, parked on a light-colored paved driveway. In the foreground, a person's hand is holding a black remote control with a silver face, pointing it towards the garage door. The overall scene is set in a well-lit, contemporary environment.

DOMINATOR[®]

Garage Door Openers

Protection Starts Here.

Tough, durable and intelligent openers work in synergy with our protective garage doors.

A man with short brown hair and blue eyes, wearing a black polo shirt with red trim and a 'DOMINATOR' logo on the chest, stands with his arms crossed. He is positioned in front of a modern building with grey horizontal siding and two large white garage doors. A red sports car is partially visible on the right side of the frame. The sky is blue with some clouds.

DOMINATOR[®]

New Zealand's most secure openers*. If you're looking for automated access using the latest in security technology, then speak to your Dominator dealer about our range of opener and remote options.

*Based on the number of possible code combinations compared to other products on the market.

What is TrioCode™ 128

A revolutionary new coding system, TrioCode™ 128 provides enhanced reliability and security by using three frequencies to overcome interference issues.

Increasingly our environment is filled with wireless devices such as cordless headphones, wireless sound systems and more, many of which operate on the same frequencies as door and gate openers. Frustratingly, these devices can jam out your door or gate opener's receiver, and the offending device may not even be in your home, it could be over 200 metres away.

TrioCode™ 128 overcomes this challenge by simultaneously transmitting on three different frequencies. Even if two frequencies are jammed, the TrioCode™ 128 transmitter will still operate your door.

Added security

Dominator's TrioCode™ 128 remotes use a 128-bit encryption which has trillions upon trillions of security codes for added protection, making them New Zealand's most secure openers*.

Featuring
TrioCode™
Technology

*Based on the number of possible code combinations compared to other products on the market.

Secure garage door control at the touch of a button

Dominator automated garage door openers come standard with TrioCode™ 128 remote control technology which delivers:

- Advanced security against code grabbing devices that attempt to gain access to your home
- Reliable operation – rest assured that your remote will work when you need it to
- Excellent operating range
- No interference from other wireless devices such as baby monitors and door bells
- 4 remote buttons so that you can operate multiple garage doors (home, bach, automatic gate, etc)

Dominator Enduro GDO-9 Premium Sectional Door Opener

With a powerful 1000N motor and adjustable speed settings, the Enduro is the opener of choice when you want the best in performance, features and peace of mind.

Overhead sectional door opener

If you want the best performance with super quiet operation, then Enduro is the opener of choice. It effortlessly delivers smooth reliable door control at the touch of a button. It includes a powerful 1000N DC motor with the flexibility to vary the speed and power output according to the door type.

Features

- Heavy duty 1000N DC motor
- Soft start and stop to reduce door stress
- Long lasting LED automatic lights
- Intelligent sensitivity system with automatic reverse – minimising the risk of damage to people, pets and property

The Enduro is compatible with single and double sized Sectional, Flex-A-Door and Tilt doors up to 18m² and comes with two TrioCode™ 128 remote controls and a wireless wall mounted remote control.

Optional door modes include

- Automatic close timer – for extra security protection
- Ventilation / pet mode – for allowing air flow or pet access into the garage
- Vacation mode – for prolonged absences

Accessories

Safety Beams

If you have young children or pets, the addition of infra-red beams provides added safety and security, as the door will automatically stop and reverse if the beam is broken whilst the door is closing.

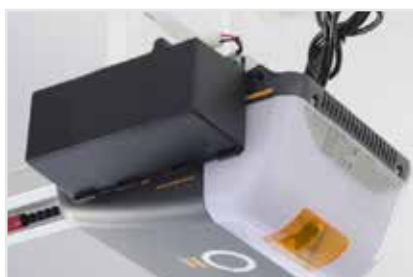

Ultra Quiet Belt Drive

If you want an even quieter door, the belt drive is the perfect addition to your motor. It is ideal for reducing noise being transferred inside, and is a must have if your bedrooms or living areas are above your garage.

Entry Key Pad

Allows entry to the garage without a remote transmitter and is great for children. There's no need to give them a key or transmitter, as they can enter the house with their PIN.

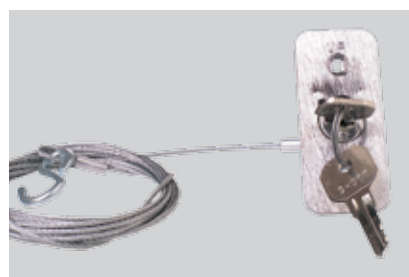

Rechargeable Battery Backup

In the event of a blackout or other break to the power supply, the opener will still be operational with a rechargeable battery backup.

Combo Access Device

This device allows you to open roller doors manually during a power failure, using a key to remove the barrel with a cord attached to the disengagement handle. It also allows for key electrical operation.

Emergency Key Release

Allows your garage door to be disengaged and operated manually from outside when there is no other garage access available.

Wall Mount Remote Control

Mounts inside the garage allowing remote door operation. Features TrioCode™ 128 technology.

Extra Remotes

Talk to your Dominator dealer if you need a replacement opener or additional openers for your family.

Security System Compliant

Dominator openers can be wired into alarm systems. This allows your remote to arm and disarm the alarm.
